

Oxford Owl Christmas Star

You will need an assistant, so make sure that an adult helps you!

You will need:

Print out of this activity sheet

Glue

Scissors

String

Sellotape

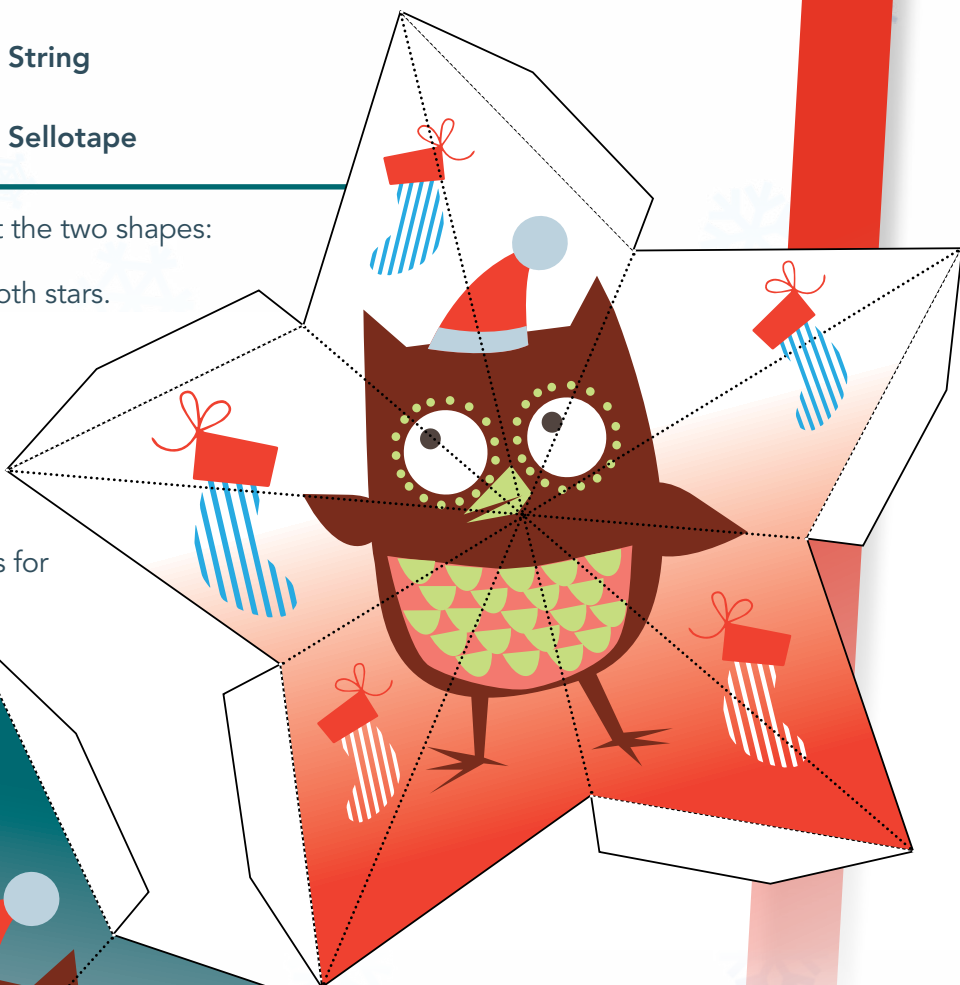

1. Print out the templates and cut out the two shapes:

2. Fold along the 5 dotted lines on both stars.

3. Fold in all 5 tabs on both stars.

4. Pinch two of the arms of the stars together so that the points are touching. Crease the folded line. When you let go you'll see that the star looks more 3D. Repeat this for each arm of the star.

5. Tape a loop of string or paper to the back of one of the stars. You can use this loop to hang your star up once it's finished.

6. To stick the two stars together, it's best to work on one arm of the star at a time. Hold the stars together back to back and carefully put glue on the two tabs of one arm. Hold the seams together until they are stuck firmly.

7. Repeat this process until all of the seams are stuck together.
