

Roll and round

1. You will need to play this game with a partner.
2. Roll a die four times and write down the numbers in the table below (your partner is allowed to see the numbers you roll).
3. Rearrange the numbers to make a 4-digit number and write this down. But don't let your partner see your new number!
4. Round your number to the nearest 10.
5. Show the rounded number to your partner and ask them to work out your number.
6. Swap roles and play again.

Player 1	Player 2

Play the game again but
roll the die five times!
