

Hot air balloons

Sally and Mikkel are at a hot-air balloon show.

Of the 36 hot-air balloons they can see floating by:

- $\frac{1}{12}$ have vertical stripes
- 25% have wavy lines
- $\frac{1}{6}$ have a dotted pattern
- $\frac{1}{3}$ are plain white
- the rest have horizontal stripes.

Decorate the hot-air balloons to show what they can see.

Answers

3 ($\frac{1}{12}$ of 36) balloons have vertical stripes.

9 ($36 \div 4$) balloons have wavy lines.

6 ($\frac{1}{6}$ of 36) balloons have a dotted pattern.

12 ($36 \div 3$) balloons are plain white.

6 ($36 - 3 - 9 - 6 - 12$) balloons have horizontal stripes.
