

How to make your own den!

You can make your very own den, just like the Wild Things. You could use it as a meeting place, a camp-out, somewhere to read . . . the possibilities are endless!

You will need:

-  rope/old washing line
-  blanket/tarpaulin
-  tent pegs
-  cushions

1. Choose a suitable patch of grass between two trees. Make sure there aren't any loose branches—you don't want them to fall off the tree and on to your den (or you!).
2. Run a rope or an old piece of washing line between the trees and secure it to the trunks, being careful not to damage the trees.
3. Drape a blanket or a tarpaulin over the rope.
4. Peg one side of the blanket to the ground.
5. Finally, decorate your den! You can use blankets, cushions, a torch. Anything you can find to make it feel comfortable.
