

Super Challenge 4: Measures and Time

IMPERIAL UNITS

1. **Imperial units** are measurements such as feets and inches, pints and gallons, pounds and ounces. As well as metric units, some countries, such as the UK and US also use imperial units to measure things. Look at the imperial units listed below and draw lines to match them to the situations they might be used in.

stone

height (length)

pint

weight (mass)

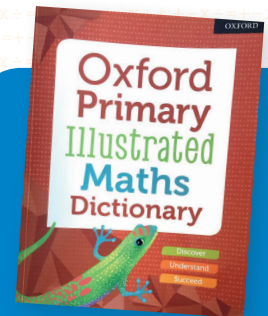

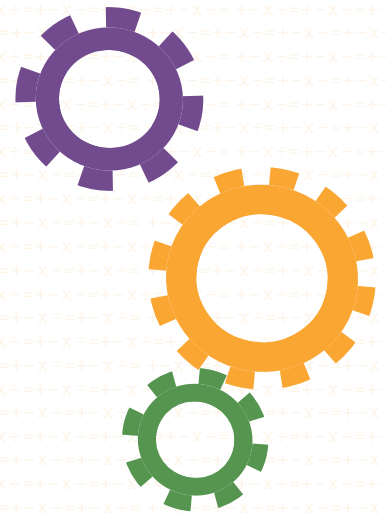

foot

speed

mile

capacity

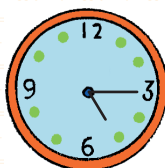

You can look up the words in bold in your **Oxford Primary Illustrated Maths Dictionary** to help you.

TIME

2. Time can be measured using either a 12-hour or a 24-hour clock. Read the times on the **analogue** and **digital clocks** below and record the times using a 12-hour clock. The first one has been done for you.

14.30

23.15

a.

2.30pm

b.

c.

d.
